Professional Summary

Computer Science and Engineering student with hands-on experience building machine learning models, NLP pipelines, and data-driven systems. Proficient in Python, scikit-learn, and transformer-based embeddings, with a strong foundation in data structures, algorithms, and software development. Seeking a part-time or entry-level role as an ML Engineer or Software Developer to apply skills in real-world environments.

Technical Skills

Languages: Python, C++, C, JavaScript

ML / NLP: Scikit-learn, Sentence-Transformers, spaCy, NumPy, Pandas, Linear Regression, Time-Series Forecasting, NER, Cosine Similarity, TF-IDF

Web Technologies: HTML5, CSS3, JavaScript (ES6+)

Databases: MySQL, SQL

Tools & Platforms: Git, VS Code, LeetCode, GeeksforGeeks

Languages (Human): English (Professional), Bengali (Native), Hindi (Professional)

Projects

AI ATS Resume Scoring System | *Python, NLP, Transformers, scikit-learn, spaCy* — Mar 2026 – May 2026

- Designed and built an end-to-end batch-processing NLP pipeline that parses resumes (PDF/DOCX) and job descriptions to produce a quantitative ATS fitness score out of 100.
- Integrated `all-MiniLM-L6-v2` (Sentence-Transformers) to generate 384-dimensional vector embeddings; applied cosine similarity via scikit-learn for semantic matching between candidate and job description.
- Used spaCy (`en_core_web_sm`) for tokenisation, lemmatisation, and Named Entity Recognition (NER) to extract technical skills from unstructured resume text.
- Implemented an ensemble scoring formula: Semantic Similarity (50%), Keyword Overlap / Jaccard-style set-intersection (40%), and Structural Density heuristic (10%).
- Engineered PDF text extraction using `pdfplumber` (multi-column layout support) and DOCX parsing with `python-docx`; pipeline outputs ranked candidate list sorted by final score.

Stock Price Prediction | *Python, Scikit-learn, NumPy, Pandas* — Mar 2026 – Apr 2026

- Built a supervised learning pipeline using Linear Regression on historical market data to forecast future stock prices end-to-end.
- Implemented a sliding-window technique for time-series feature engineering; evaluated performance with RMSE (∼3) and MAPE (∼1.16%).

Library Management System | *C++, OOP, File Handling* — Jan 2025 – Feb 2025

- Developed a menu-driven console application applying OOP principles (inheritance, encapsulation) and file I/O for persistent storage of book records and transactions.

Education

JIS College of Engineering — 2022 – Present
B.Tech in Computer Science and Engineering — *CGPA: 7.67 / 10.0*

Kabi Bijoylal HS Institute — 2021
Higher Secondary (Science) — *86%*

Kalinagar High School — 2019
Secondary (Class X) — *75%*

Certifications

- **Introduction to Data Science** — Data Analysis, Visualization & ML Fundamentals, Cisco Networking Academy — Jun 2026
- **Soft Computing** — Neural Networks, Fuzzy Logic, Genetic Algorithms, NPTEL / IIT Kharagpur — Feb–May 2025
- **Introduction to SQL** — Relational Databases and Query Optimisation, SkillUp — Aug 2025
- **Data Structures** — UC San Diego / Coursera — Jan 2024

Achievements

- Solved 250+ coding problems on LeetCode and GeeksforGeeks covering arrays, trees, graphs, dynamic programming, and greedy algorithms using C++ and Python with focus on time and space complexity optimisation.
