PROFESSIONAL SUMMARY

Computer Science and Engineering student with hands-on experience building machine learning models, web applications, and data-driven systems. Proficient in Python, C++, and JavaScript with a strong foundation in data structures, algorithms, and software development. Seeking a part-time or entry-level role as an ML Engineer or Software Developer to apply and expand technical skills in real-world environments.

EDUCATION

JIS College of Engineering <i>Bachelor of Technology in Computer Science and Engineering</i> CGPA: 7.67 / 10.0	Kalyani, West Bengal 2022 – Present
Kabi Bijoylal HS Institute <i>Higher Secondary Education (Class XII – Science)</i> Percentage: 86%	2019 – 2021
Kalinagar High School <i>Secondary Education (Class X)</i> Percentage: 75%	2013 – 2019

TECHNICAL SKILLS

Programming Languages: Python, C++, C, JavaScript
Machine Learning: Linear Regression, Time-Series Forecasting, Scikit-learn, NumPy, Pandas
Web Technologies: HTML5, CSS3, JavaScript (ES6+)
Databases: MySQL, SQL
Developer Tools: Git, VS Code
Platforms: LeetCode, GeeksforGeeks
Languages: English (Professional), Bengali (Native), Hindi (Professional)

PROJECTS

Stock Price Prediction <i>Python, Machine Learning, Scikit-learn, NumPy, Pandas</i> - Built a stock price prediction system using historical market data and Linear Regression to forecast future prices. - Implemented a sliding window technique for time-series feature engineering, improving model input quality. - Evaluated model performance using RMSE and MAPE metrics; achieved ~3 RMSE and ~1.16% prediction error. - Demonstrated ability to apply supervised learning to real-world financial datasets end-to-end.	Mar 2026 – Apr 2026
Online Quiz Web Application <i>HTML, CSS, JavaScript</i> - Designed and developed a login-based quiz platform supporting multiple quiz categories for concurrent users. - Implemented dynamic question rendering, score calculation logic, and session-based authentication. - Built a fully responsive UI using vanilla JavaScript and CSS3 without any external frameworks.	Jun 2025 – Jul 2025
Library Management System <i>C++, OOP, File Handling</i> - Developed a menu-driven console application to manage book records, issue/return transactions, and user data. - Applied object-oriented programming principles (inheritance, encapsulation) and file I/O for persistent storage. - Automated library workflows, reducing manual effort and improving data accuracy and retrieval speed.	Jan 2025 – Feb 2025

CERTIFICATIONS

SAP S/4HANA Development <i>Certificate of SAP – Enterprise Application Development</i>	SAP University Alliances Apr 2024 – Sep 2024
Soft Computing <i>Certificate of Completion – Neural Networks, Fuzzy Logic, Genetic Algorithms</i>	NPTEL, IIT Kharagpur Feb 2025 – May 2025
Introduction to SQL <i>Certificate of SQL – Relational Databases and Query Optimization</i>	SkillUp Aug 2025

ACHIEVEMENTS

Competitive Programming - Solved 250+ coding problems across LeetCode and GeeksforGeeks covering arrays, trees, graphs, dynamic programming, and greedy algorithms. - Strong proficiency in Data Structures and Algorithms (DSA) with C++ and Python, focusing on time and space complexity optimization.	LeetCode & GeeksforGeeks
